

## **ID order list of meetings in frontend**

Posted by Tom16 - 2015/02/03 16:13

---

Hi,

I have a list of meetings in the same order as the ID's.  
At the frontend they are all mixed up.  
Is there a way to show them in the right order (ID)?

Tom

The order of the meeting is based on the "ordering" field that you have in the back-end and the title of the meeting.

To change the order in the back-end, click on the "ordering" column title and re-order the meeting.

Hello,

I have the MeetingSchedule\_unzip\_first\_V1.0.04 file. However, I do not see all riders as described in the instructions (see picture).

This will be the problem.  
Joomla 3.4.1

Select image file to attach --> don't go. I get a white Site after submit

What do you mean by "riders" ?  
Do you mean tabs?

If you don't see the tabs or the whole page, that may mean that you had a php fatal error or that Joomla

java script had an error to display the tabs correctly.
